Summary

Logic Developer specializing in rule-based decision systems and LLM prompt engineering for healthcare and insurance platforms, translating ambiguous human criteria into reliable, autonomous logic. Background in UX research and interactive 3D design (Unity, Three.js) informs a user-centered approach to system logic. Seeking roles in logic development, rule engineering, or AI prompt engineering.

Skills

Languages: Python, Go, C#, JavaScript, HTML/CSS, Linux/Unix

AI & Systems: LLM Prompt Engineering, Claude Code, Boolean Rule Design, Regex, SQL, Firebase, Git, Version Control

Frameworks & Creative: Node.js/Express, Three.js, Unity, Figma, Adobe Creative Cloud, Autodesk Maya

Methods & Research: Workflow & Project Management, Agile/Kanban, Stakeholder Communication, Quality Assurance (QA), User Study Design, Thematic & Semantic Analysis, Data Analysis & Processing

Work Experience

Notable Systems

Remote

AI Prompt Specialist

Mar 2026 - Jul 2026

- Developed automated Go scripts for the extraction of key information from unstructured medical documentation, increasing data accuracy for insurance billing workflows.
- Redesigned Asana project taskboards and workflows around Agile Kanban practices for the AI Prompt team, providing for better task monitoring and more accurate progress timelines for stakeholders.
- Created shell and Python scripts to automate large-scale rule testing and client data analysis to reduce manual testing and accelerate implementation cycles.

Business Rules Developer

Mar 2025 - Mar 2026

- Communicated with Client Success and Engineering teams to code LLM prompts and create logic-based rules assessing insurance providers' medical product coverage, ensuring custom builds match stakeholder goals.
- Managed file operations and version control to maintain data integrity throughout rule implementations.

Success Academy Union Square

New York, NY

K-1 Science Teacher

Jul 2024 - Mar 2025

- Guided classes of 25-30 students through hands-on lessons, supplementing curriculum with original materials.
- Tutored students after school and partnered with parents on at-home strategies to help students improve.

Education

Wellesley College

Wellesley, MA

B.A. in Media Arts and Sciences, Concentration in Computer Science

May 2024

Honors: 2024 CHI Undergraduate Research Competition Winner

Relevant Coursework: Data Structures, Combinatorics & Graph Theory, Social Computing, Computer Graphics, Advanced Projects in Interactive Media, Digital Worlds for Gaming, Intro to Web Development

Projects

LinguaGemma: LLM chatbot benchmarking growth-mindset vs. fixed-mindset prompt logic; 2024 CHI Undergraduate Research Award, team of 3

Clipboard: Web app connecting students via capacity-triggered group reveals and event planning; team of 3

In A Jam!: 3D Unity game with player-driven navigation, scripting, and cutscenes; team of 2

Interactive Vending Machine: Fully modeled 3D vending machine with dynamic lighting and interaction logic; Three.js, team of 2
