

Abby Rayne Stovall

raynestovall02@gmail.com | Brooklyn, NY | <https://araynestovall.github.io/RaynesPortfolio/>

Education

Wellesley College

B.A. in Media Arts and Sciences, Concentration in Computer Science

Honors: 2024 CHI Undergraduate Research Competition Winner

Wellesley, MA

May 2024

Skills

Logic and Systems: Python, Go, Boolean Rule Design, LLM Prompt Engineering, Shell/Unix, Version Control, Git

Research and Product: Workflow/Project Management, User Study Design, Thematic/Semantic Analysis, Data Processing

Front End and Creative: HTML, CSS, JavaScript, Node.js/Express, Three.js, Unity/C#, Figma, Adobe Creative Cloud, Autodesk Maya/Inventor, Firebase

Work Experience

Notable Systems

Remote

AI Prompt Specialist

Mar 2026 - Jul 2026

- Developed automated Go scripts for the extraction of key information from unstructured medical documentation for the Order Intake system, increasing data accuracy for insurance billing workflows.
- Redesigned Asana project taskboards and workflows for the AI prompt team, providing for better task monitoring and more accurate progress timelines for stakeholders.
- Created shell and Python scripts to automate large-scale rule testing and client data analysis to reduce manual testing and accelerate implementation cycles.

Business Rules Developer

Mar 2025 - Mar 2026

- Coded, iterated upon, and refined LLM prompts to create logic-based rules for several different Durable Medical Equipment (DME) products and insurance providers within our Claims Manager system, addressing edge cases across a wide array of requirements and scenarios to achieve 95% accuracy in automated insurance billing recommendations.
- Communicated with Client Success and Engineering teams to turn client needs into logical rule systems, ensuring custom product builds match stakeholder goals.
- Managed file operations and version control to maintain data integrity throughout rule implementations.

Success Academy Union Square

New York, NY

K-1 Science Teacher

Jul 2024 - Mar 2025

- Guided kindergarten and first grade students through hands-on lessons using Success Academy's experiment-based science curriculum, frequently supplementing with original materials.
- Implemented IEP accommodations, including behavior-tracking sticker charts, to support the individual needs of students requiring additional accommodations.
- Tutored struggling students after school and partnered with parents on at-home strategies, such as nightly reading, to help students catch up academically.

Projects

LinguaGemma: An LLM-based Chatbot for Language Learning

Wellesley, MA

Researcher and Developer, Team of 3

Sept 2023 - May 2024

- Collaborated on the end-to-end development of an AI-driven language learning tool, revising and refining it after the initial course project through its publication and winning at the 2024 CHI undergraduate research competition.
- Designed and executed formal user studies to evaluate the impact of LLM prompting on growth mindset and educational retention.
- Analyzed user performance data and chat logs to improve chatbot logic, boosting user confidence.
